We are sorry to be constrained to acknowledge that the President's Message is on the point of chief solicute to the conservative men of the country by no means satisfactory.

The point to which we refer is of course the future policy of the Administration with respect to slavery. Concerning this point in its principal aspect the message contains the following passage:

The Scientific American is indispensable to every inventor, as it not only contains illustrated descriptions of nearly all the best inventions as they come out, but each number contains an Official bist of the Claims of all the Patents issued from the United States Patent Office during the week previous; thus giving a correct history of the progress of inventions in this country. We shallcontinue to transfer to our columns explosus extracts from these journals of whatever we may deem of interest to our readers.

CHEMISTS, ARCHITECTS, MILLWRIGHTS, AND FARMERS.

This is altogether a new medicine, the result of modern discoveries in the vegetable kinglom, being an entirely new and abstract method of enre, irrespective of all the old and worn out systems published by accomplished quacks to the suffering. Dr. Wright, well knowing the deception practised upon, the animitiated, felt it his duty at once to have this blixir tested by the whole Medical Faculty, who, without even one dissouting voice, have given in their adherence to its perfect and undivided control over the whole physical man when his frame has been reduced, and when all other medicines known to the Pharmacopecia have been tried in vain. Long thought, years of pattern investigation, and a nil desperantion determination, have crowned the Dector's efforts, and be now offers the blixir to suffering huganity as the only thing that can cure the following diseases—namely:
